PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science & AI/ML undergraduate (CGPA: 9.27, Top 1% Diploma) with practical experience in full-stack web development, AI integration, and database management. Skilled in Python, Java, SQL, and building responsive web applications with interactive APIs. Seeking a Software Engineering or AI/ML Internship to contribute to impactful projects while expanding technical expertise.

EDUCATION

B.Tech in Artificial Intelligence and Machine Learning | Expected May 2028

GITAM (Deemed to be University), Bangalore | CGPA: 9.27 / 10.0 (3rd Year)

Diploma in Computer Engineering | May 2025

Sree Vidyanikethan Engineering College, Tirupati | Percentage: 97.29% (Cohort Top 1%)

EXPERIENCE

InAmigos Foundation | Data Analytics Intern | Remote, India [Aug 2026]

- Conducted exploratory data analysis (EDA) and data cleaning across operational datasets using Python and SQL.
- Created structured summary reports and data visualizations to assist in decision-making and operational tracking.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, SQL, JavaScript (ES6+), PHP

AI & Machine Learning: Machine Learning Foundations, PyTorch, Gemini Vision API, Prompt Engineering, Data Analysis

Web Development: HTML5, CSS3, JavaScript, Bootstrap, RESTful APIs, Leaflet.js, OpenStreetMap

Databases: MySQL (Relational Schema Design, SQL Queries, Indexing)

Developer Tools & Core CS: Git, GitHub, VS Code, Linux, Data Structures & Algorithms (DSA), OOP, DBMS, OS

PROJECTS

CivicConnect — AI-Powered Smart Municipal Intelligence Platform | Hackathon Project

Tech Stack: Python, Gemini Vision AI, PyTorch, MySQL, Leaflet.js, JavaScript, OpenStreetMap | Live Demo: civicconnect-qlwi.onrender.com

- Developed a 3-tier municipal web platform (Citizen, Field Officer, Admin) connecting citizens with city administrators for civic issue resolution.
- Integrated Google Gemini Vision API for automated image classification and issue severity scoring, with a local PyTorch CNN offline fallback.
- Implemented geospatial duplicate detection using the Haversine formula to cluster nearby complaints and prevent duplicate database entries.
- Built a 24/7 multilingual conversational assistant (CivicBot) supporting 4 regional languages (English, Telugu, Hindi, Kannada).

FlexiRide — Full-Stack Campus Ride-Sharing Platform | Personal Project

Tech Stack: PHP 8.x, MySQL, JavaScript, HTML5/CSS3, Bootstrap, Git | Live Demo: flexiride-pnnz.onrender.com

- Developed a full-stack campus ride-sharing web platform featuring ride publishing, multi-waypoint route matching, and real-time in-app chat.
- Implemented transactional database locks in MySQL to prevent double-booking across concurrent seat reservations.
- Built a dynamic pricing calculation module with campus rush-hour surge pricing and eco-incentive discounts for Electric Vehicles (EVs).
- Integrated user identity verification using the Verhoeff checksum algorithm for Aadhaar validation, emergency SOS dispatch, and secure session authentication.

CERTIFICATIONS & SIMULATIONS

GenAI Powered Data Analytics Job Simulation — Tata (via Forage) | July 2026

- Completed practical tasks in exploratory data analysis (EDA), predictive modeling with AI, business reporting, and data storytelling.

ACADEMIC DISTINCTION & COURSEWORK

Relevant Coursework: Data Structures & Algorithms, Database Management Systems (DBMS), Operating Systems, Machine Learning Foundations, Computer Networks.

Academic Distinction: Ranked in Top 1% of cohort with 97.29% aggregate in Computer Engineering Diploma.
